

## **Dr. Charles M. Intenzo, Thomas Jefferson University Hospital, Philadelphia, Pennsylvania**

Dr. Intenzo is Professor of Radiology at Thomas Jefferson University and Director of Nuclear Medicine and PET. He is board certified in Nuclear Medicine, and has co-authored 70 peer-reviewed articles in the medical literature.

As an academic medical center, Thomas Jefferson University Hospital believes in the importance of an excellent clinical setting for patients and as a foundation for the learning experience of Jefferson students and residents. It is within the various clinical settings that technologists, scientists, nurses, attending physicians, residents, medical students, and allied health students learn their professions and work collaboratively as a team and help define the future of clinical care.

Jefferson Center City Imaging (JCCI) is located in close proximity to the Thomas Jefferson University campus and is a partnership between Thomas Jefferson University Hospital (TJUH), and Outpatient Imaging Affiliates (OIA). Jefferson's radiology department provides nationally recognized subspecialty expertise while OIA's center management provides service oriented culture for a patients and referring physicians. JCCI has set a new standard in quality of care providing comprehensive imaging services in the convenience of an outpatient setting.

JCCI houses 2 PET scanners, including the Siemens Biograph 6 Hi-Rez PET•CT scanner, in addition to providing MRI, CT, Ultrasound, X-ray, and DEXA imaging services.
